

REHAU®

Unlimited Polymer Solutions

RAUTITAN PEX PLUMBING SYSTEM

Secure. Easier. Faster.

SECURE

Simple. Robust. Reliable.

RAUTITAN PIPES

RAUTITAN pipes are made from high density cross-linked polyethylene (PE-Xa). The cross linking process causes the individual polyethylene molecules to bond in a three-dimensional network creating a tough and durable pipe with superior:

- long-term stability
- high temperature resistance and
- high pressure resistance
- superior flexibility and strength.

The external black PE-sheath blocks more than 99.9% of light transmission through the pipes to prevent the growth of algae within the plumbing system to maintain the system's hygiene.

FLEXIBLE CROSS-LINKED POLYETHYLENE (PEX) SYSTEM WITH UNIQUE REHAU COMPRESSION SLEEVE JOINTING TECHNOLOGY

For hot and cold water applications.

The RAUTITAN system includes a single PN20 pipe system for both hot and cold water, which has been exposed in long-term tests at extreme temperature and pressure conditions to confirm its lifespan of over 50 years even for hot water application.

100% permanent leak-proof

Additional O-rings or other sealants, which can be weak points over the long-term, are not needed because the pipe itself functions as a sealant.

Pressure test up to 150 psi

The RAUTITAN compression sleeve joint is a simple, robust and reliable connection.

EASIER

Engineered for your convenience

RAUTITAN SYSTEM PROVIDES

- Simple, fast and robust jointing technique
- Up to 100m coiled pipe runs. No joint!
- More than 30% less joints per installation
- No waiting for cool down periods before pressurizing the system

One pipe for hot and cold

The RAUTITAN system includes a single PN20 pipe for both hot and cold water applications.

No welding, no brazing!

RAUTITAN's robust 'cold' compression sleeve jointing technology requires no brazing, no welding, no open flames or hot welding tools.

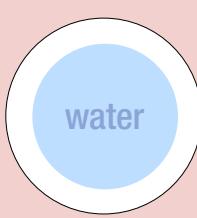

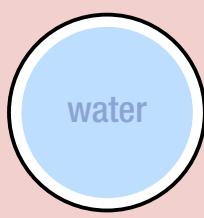

ADVANCED LIGHT WEIGHT MATERIAL AND INNOVATIVE JOINTING TECHNOLOGY

ensure that RAUTITAN is the most convenient and robust plumbing system available.

No deburring
of pipes
required

No scaling!

Inner diameter

Due to corrosion and scaling resistant properties, the RAUTITAN system provides the highest standard of hygiene and hydraulic performance, today and in the future.

Reduce workmanship fault

RAUTITAN system can be installed in one single pipe run; no connections; 100% system security!

20% less wastage

RAUTITAN pipes can be cut exactly to the length of the required pipe run.

Sealed
without
O-ring

FASTER

Save time, save cost

RAUTITAN PX fittings

For sizes 16mm to 40mm, non-threaded RAUTITAN fittings, PPSU (polyphenyl sulphone) and compression sleeves, PVDF (polyvinylidene fluoride).

RAUTITAN MX fittings

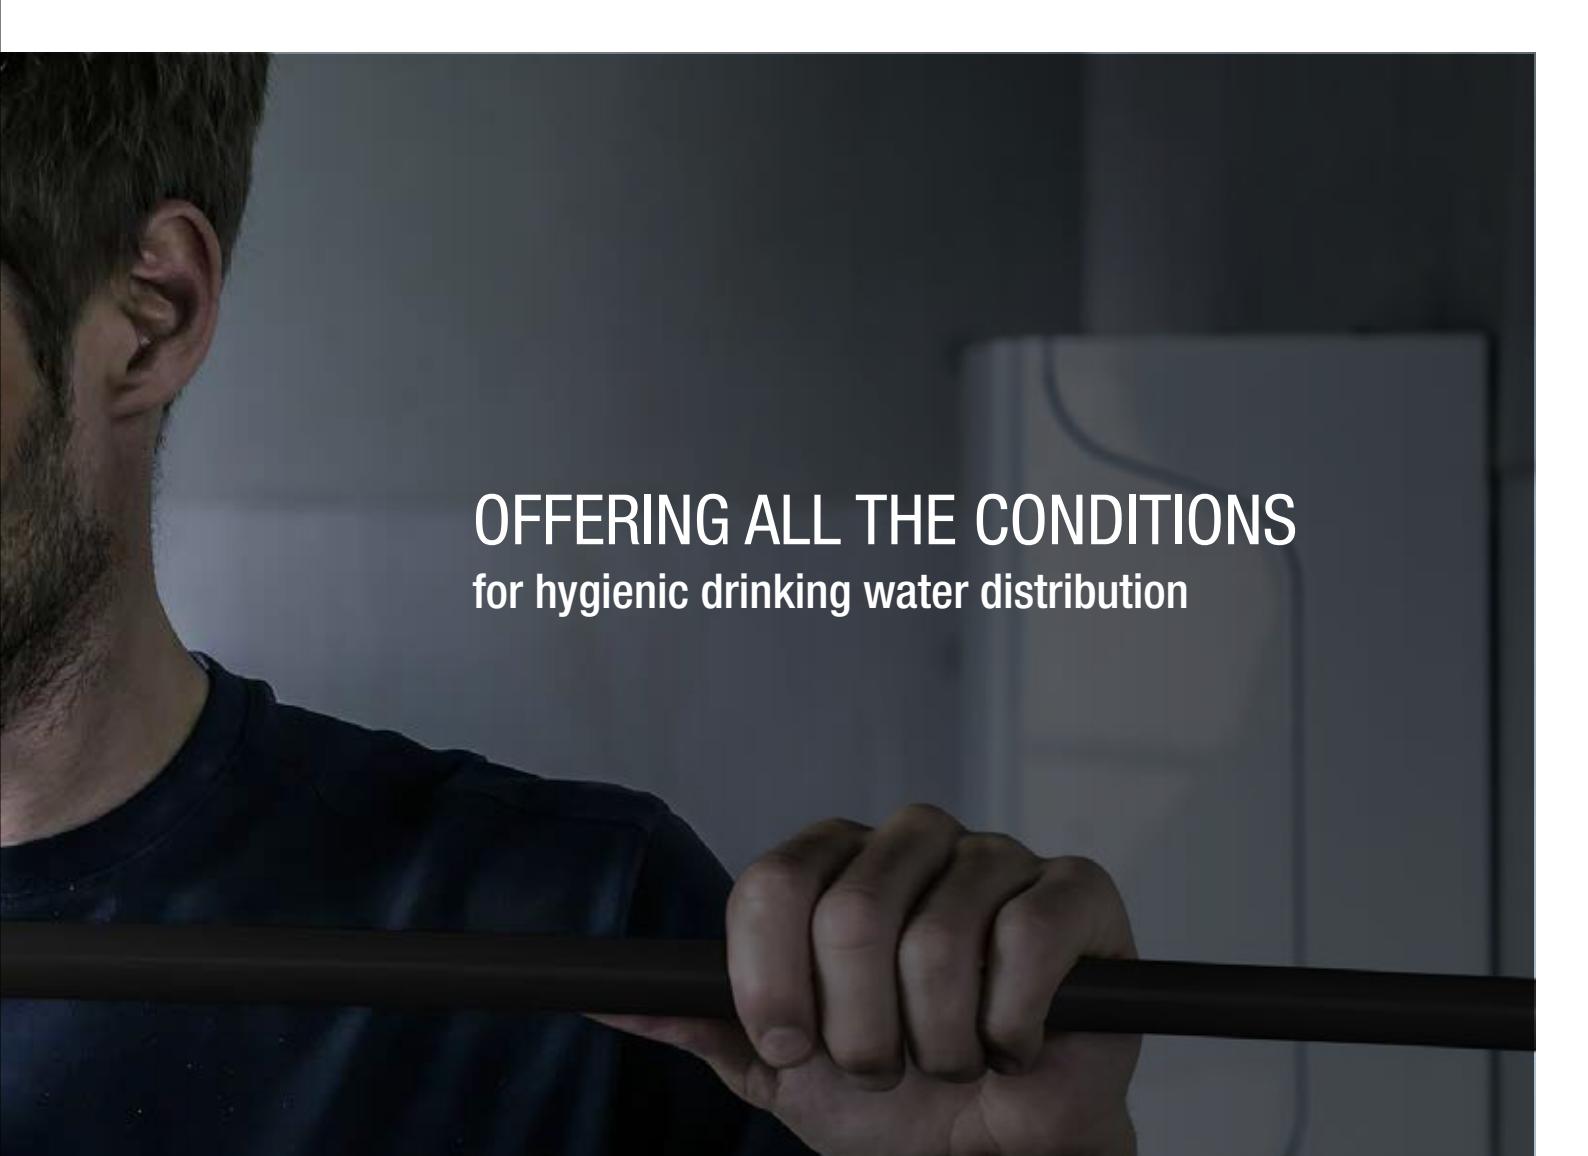

For sizes 50mm to 63mm high quality Dezincification resistant brass fittings

>30% lesser joints

RAUTITAN PE-Xa pipes give you the freedom to bend around corners and around existing services to complete the installation.

Up to 50% less labour

RAUTITAN's light weight materials and simple jointing process ensure it is a one man job.

OFFERING ALL THE CONDITIONS for hygienic drinking water distribution

Install a valve with no threaded connection

RAUTITAN valves are featured with unique REHAU compression sleeve connection joints that can create a permanent seal to our RAUTITAN PEX pipes.

100% seamless connection

Unique PEX/PPR adaptors to avoid using threaded connection between the two systems.

TOOLS AND ACCESSORIES

Universal and professional

TWO EASY STEPS TO SECURITY

Making a 100% leak-proof joint has never been this easy. Utilized for over 30 years and across millions of connections REHAU guarantees a 100% permanent leak-proof joint in just two simple steps!

1. Expand the pipe

2. Compress and complete!

RAUTOOL - THE MODULAR TOOL FOR EVERY REQUIREMENT

Only RAUTOOL assembly tools guarantee easy installation and fully leak-proof connections. Its compact construction simplifies handling and also makes it possible to install in the toughest construction sites. Available in a multitude of modular options, the RAUTOOL program can be tailored to the individual needs of each and every installer.

Simple mechanical design and robust materials ensure long-lasting performance, minimal tool maintenance and regular calibration.

RAUTOOL A-LIGHT2 KOMBI

Combo tool

Dimensions 16 – 40 mm

RAUTOOL M-LIGHT

Compression sleeve joint tool

Dimensions 16 – 20 mm

RAUTOOL G2

Compression sleeve joint tool

Dimensions 40 – 110 mm

SPECIFICATION

Material:	-	PE-Xa
Colour (surface)	-	Black
Notch impact strength at 20°C	-	No fracture
Notch impact strength at -20°C	-	No fracture
Average coefficient of expansion When laying with pipe support channel: - Size 16 - 40 - Size 50 - 63	[mm/(mK)]	0.15 0.04 0.1
Thermal conductivity	[W/(mK)]	0.35
Pipe roughness	[mm]	0.007
Operating pressure (maximum at 70°C)	[bar]	10
Operating temperature - Maximum - Minimum	[°C]	90 -
Short-term maximum temperature (malfunction)	[°C]	100
Material constant C	-	12
Minimum bending radius without tools $d = \text{pipe diameter}$	-	$8 \times d$
Minimum bending radius with pipe bend brackets $d = \text{pipe diameter}$	-	$3 - 4 \times d$
Available sizes	[mm]	16 – 63

STANDARD AND CERTIFICATION

BS 6920

Suitability of non-metallic products for use in contact with water intended for human consumption with regard to their effect on the quality of water

RAUTITAN WATER SERVICES

Product range

1.1 Pipes/pipe accessories for drinking water installations

RAUTITAN his

Application: for drinking water installation
Certification: DVGW-registration number: DVGW DW-8301AG2102 (system approval)
Feature: building material class: B2 according to DIN 4102-1 or E according to DIN EN 13501-1
Material: high-pressure cross-linked polyethylen (RAU-PE-Xa) according to DIN EN ISO 15875 and DVGW worksheet W 544
Colour: natural (white)

Protective pipe

Application: REHAU pipe protection
Feature:

- as protection against condensation according to DIN 1988, part 200
- as mechanical protection of the radiator connecting pipes, for which there is no requirement to the insulation thickness according to EnEV
- protection in the area of the pipe inlets to the manifold and in the crossing zone of expansion joints in the screed according to DIN 18560
- according to DIN 49019, adjusted for thermal resistivity up to +105 °C
- building material class: B2 according to DIN 4102-1 or E according to DIN EN 13501-1

Material: polyethylene
Colour: black

Supporting clip channel

Application: to support or to hold installed RAU-PE-Xa-pipes
 Feature:

- reduce the temperature related expansion in length of RAU-PE-Xa-pipes
- self-supporting installation without additional fixing
- to increase the pipe clamp distance
- length: 3 m

Material: galvanized steel

1.2 Universal compression sleeves and fittings RAUTITAN for drinking water systems

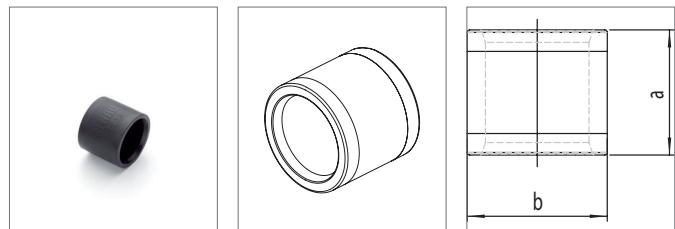

Compression sleeve RAUTITAN PX

Application: - to install the permanently tight connection technology compression sleeve according to DVGW-worksheet W 534
 - in combination with the pipes RAUTITAN stabil, RAUTITAN flex and RAUTITAN his with suitable fittings RAUTITAN
 - also useable with RAUGEO polymer fitting and RAUGEO tube green and collect

Feature: usable on both sides

Material: PVDF

Colour: black
